

!RED ALERT

Warning

Lethal liquid MDMA in circulation

June 24 2022

An orange/brown liquid containing lethal doses of MDMA is currently being sold. Do not use this liquid!

Have your Dutch drugs tested!

For more info:

[DrugsRedAlert.nl](https://www.drugsredalert.nl) & [Drugs-Test.nl](https://www.drugs-test.nl)

The consumption of drugs is never without risks. Do you want to be completely safe? Don't use.

Why dangerous?

MDMA can be lethal in high doses

This liquid contains pure MDMA, it is impossible to dose this safely.

Similar liquids have been found earlier this year in champagne bottles

Do you have liquid MDMA in your possession that resembles these features? Have it tested free and anonymous at a **drug checking service**.

Did someone already use this substance?
Immediately call 112 (you run no risk of being arrested by police).

Have your Dutch drugs tested!
